

# Enterprise IT Infrastructure & Cybersecurity Solutions

A trusted System Integrator delivering scalable, secure, and future-ready IT for enterprise, government, and public sector.

System Integration

Cybersecurity

Networking

Data Center

# A Trusted SI Partner Building Modern IT

End-to-end System Integration across infrastructure, networking, cybersecurity, and managed services.

## Who We Are

- Full-stack SI across infrastructure, networking, and cybersecurity
- Design → Deploy → Operate mission-critical IT environments
- Serving Government, Education, Healthcare, and Enterprise
- OEM-certified expertise, vendor-neutral advisory

End-to-End Execution

Vendor-Neutral

OEM-Certified

*“We engineer IT infrastructure that scales with your business — secure, reliable, and built to last.”*

## End-to-End

Design → Deploy → Operate

## Multi-OEM

Certified technology stack

## 24/7

Managed support coverage

## Pan-India

Delivery & implementation

# Purpose, Direction, Principles

Short, sharp statements that guide every engagement and every engineering decision.

## VISION

**To be India's most trusted System System Integrator — delivering scalable, secure, and future-ready IT IT that empowers every enterprise and enterprise and citizen we serve.**

## MISSION

- **Deliver measurable outcomes**  
Engineer solutions that move the needle on uptime, security, and ROI.
- **Adopt global best practices**  
Modern architectures, OEM standards, and continuous innovation.
- **Execute with discipline**  
On-time, on-budget deployments with transparent governance.
- **Build long-term partnerships**  
Trusted advisors through design, deploy, and lifecycle support.

# Five Pillars of System Integration

The full stack SRI INFOIT builds, secures, and operates for enterprise clients.

01

## IT Infrastructure

Servers, storage, virtualization, and client devices engineered for uptime and scale.

02

## Networking

LAN, WAN, SD-WAN, and wireless networks designed for performance and security.

03

## Cybersecurity

Firewalls, endpoint protection, VAPT, SOC readiness, and compliance frameworks.

04

## Software & Licensing

Genuine OEM software with with volume, subscription, subscription, and enterprise enterprise licensing.

05

## AMC, CAMC & FMS FMS

Tiered support: break-fix AMC, CAMC, and end-to-end to-end Facility Management Management Services.

**Integrated Delivery** · One accountable partner from consulting and architecture through deployment and 24x7 managed services.

# Modern Architectures, Production-Ready

Reference solutions deployed across enterprise and public-sector environments.

SOFTWARE-DEFINED WAN

## SD-WAN

Application-aware routing, centralized policy, and zero-touch deployment across distributed sites.

WIRED + WIRELESS

## Enterprise Networking

High-density campus Wi-Fi, access/core switching, and unified fabric for hybrid workforces.

COMPUTE + STORAGE

## Data Center

HPC, HCI three-tier, and modular DC builds with high availability, DR, and energy efficiency.

HYBRID & MULTI-CLOUD

## Cloud Integration

Secure connectivity, landing zones, and workload migration to AWS, Azure, and private cloud.

ZERO TRUST

## Security Architecture

NGFW, ZTNA, SASE, endpoint, and identity controls mapped to your risk posture.

IP CCTV + ACCESS

## Surveillance & Physical

Enterprise-grade surveillance, access control, and command-and-control integrations.

# Defense-in-Depth, Built for Compliance

A layered security program spanning perimeter, endpoint, identity, and response.

LIVE SOC DASHBOARD · ILLUSTRATIVE

**VAPT** Network, web, and mobile app pen-testing.

**Firewall / UTM** NGFW with IPS, URL filtering, sandboxing.

**Endpoint** EDR/XDR, DLP, device control, patch auto.

**SOC Readiness** SIEM, log correlation, 24/7 response.

**Identity & ZTNA** IAM, MFA, PAM, Zero Trust access.

**Compliance** ISO 27001, CERT-In alignment.

# Our Technology Partners

Deep, multi-vendor relationships — we recommend what's right, not what's convenient.

 <p>Networking &amp; Switching</p>	 <p>Next-Gen Security &amp; Firewall</p>	 <p>NGFW &amp; Cloud Security</p>	 <p>Compute, Storage, Servers</p>
 <p>Campus Wi-Fi &amp; Access</p>	 <p>Servers &amp; Workstations</p>	 <p>Structured Cabling &amp; Power Power</p>	 <p>Passive Network Infrastructure</p>
 <p>App Delivery &amp; SSL VPN</p>	 <p>App Delivery &amp; WAF</p>	 <p>DDoS, CDN, Zero Trust</p>	 <p>DDoS &amp; Application Security</p>
 <p>DC Power &amp; Cooling</p>	 <p>Devices &amp; Workstations</p>	 <p>Cloud Platform</p>	 <p>Cloud &amp; Hosting</p>
 <p>Productivity &amp; Licensing</p>	 <p>IT Ops &amp; Service Management</p>	 <p>Endpoint &amp; Data Security</p>	 <p>SMB Networking &amp; Wi-Fi</p>

Vendor-Neutral, Multi-OEM Delivery · Single point of accountability across the stack

# Built to Onboard, Ready to Deliver

Why leading OEMs should enable SRI INFOIT as a channel partner.

**10+**

**YEARS**

of System Integration experience across enterprise & public sector.

**25+**

**CERTIFIED ENGINEERS**

credentialed across Cisco, Fortinet, Aruba, and more.

**100+**

**DEPLOYMENTS**

from SMB pilots to multi-site tender-grade rollouts.

**4**

**INDUSTRIES**

government, education, enterprise, and and healthcare served.

**WHAT WE BRING**

## To the Partnership

- ✓ Pan-India delivery & implementation capability
- ✓ OEM-certified technical depth across the stack
- ✓ Tender-grade documentation & compliance governance
- ✓ Pre-sales solutioning and post-sales lifecycle coverage
- ✓ Dedicated practice teams aligned to OEM technologies
- ✓ Vendor-neutral advisory that protects OEM positioning

# Where We Deliver Impact

Sector expertise shaped by years of infrastructure, networking, and security deployments.

## Government & Public Sector

Compliant, large-scale IT for central, state, and PSU programs with tender-grade governance.

Secure • Compliant • Audited

## Education

Smart campus networks, computer labs, digital classrooms, and managed connectivity.

Campus Wi-Fi • EdTech • Labs

## Enterprise & Corporate

Infrastructure modernization, cybersecurity, and business continuity for mid-to-large enterprises.

DC • Security • Cloud

## Healthcare

Reliable clinical networks, HIS-ready infrastructure, and data protection for patient systems.

HIPAA-aware • HA • DR

# Why SRI INFOIT

Four reasons enterprise buyers and OEMs choose us as their integration partner.

01

## Certified, Multi-OEM Expertise

Fortinet NSE 7 (Network Security Architect) and Cisco Certified Specialist credentials backing every engagement and more.

02

## Proven SI Execution

Governance, rollout tooling, and site-ops maturity that de-risks tender-grade deployments.

03

## Vendor-Neutral Advisory

We recommend the right technology for your outcome — not the not the easiest commission.

04

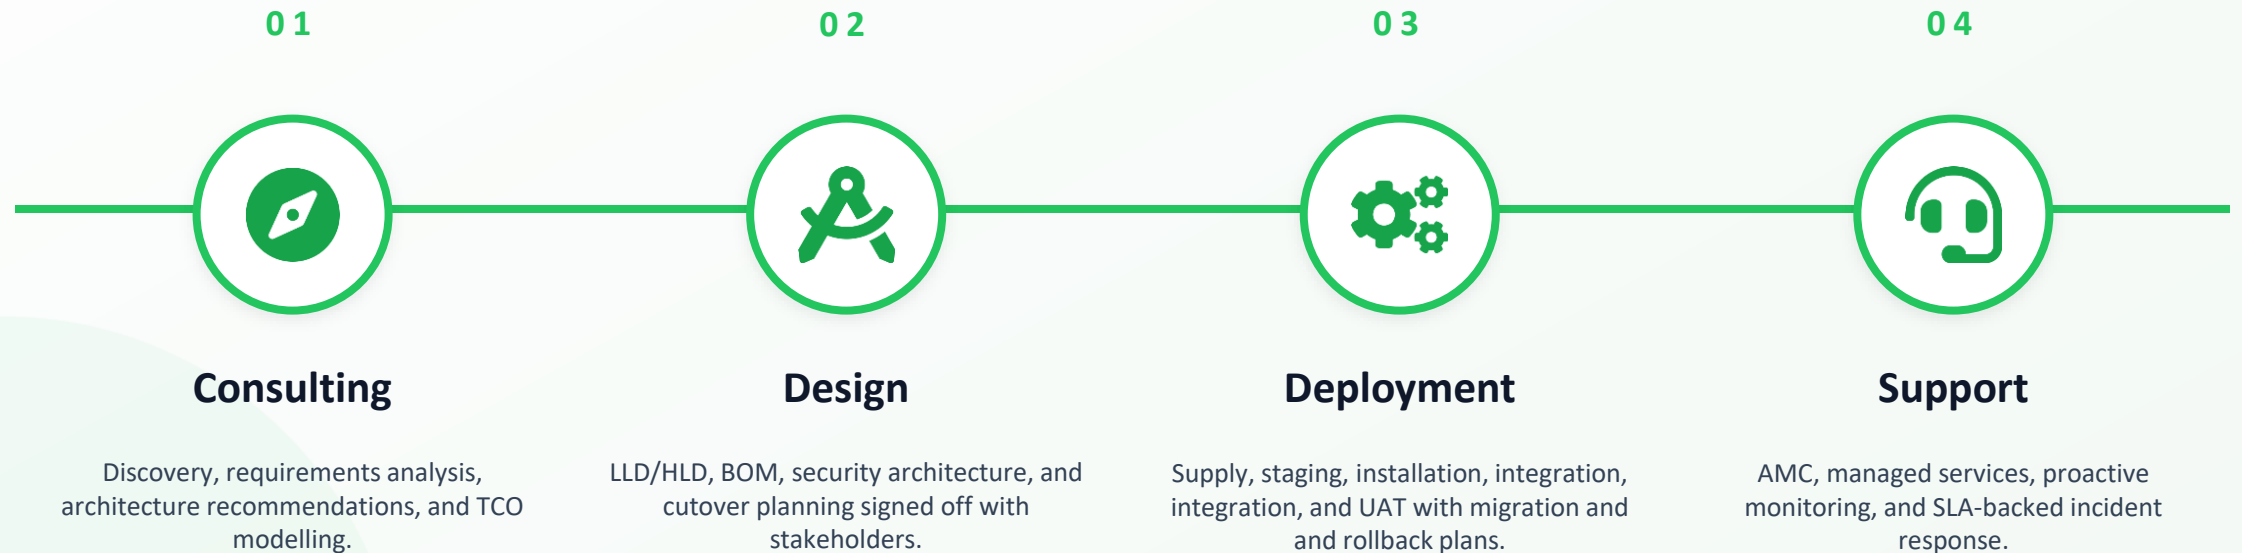

## Lifecycle Ownership

Single accountability from requirement analysis through AMC, AMC, CAMC, and FMS — 24x7 if required.

# From Consulting to Continuous Support

A four-stage delivery model that brings clarity, cadence, and accountability.

Governance at every stage · Weekly cadence · RACI alignment · Change control · Transparent reporting

# Outcomes, Not Just Deployments

Representative engagements delivering measurable business value across sectors.

**GOVERNMENT**

**99.9%** UPTIME

**Secure Multi-Site Network Modernization**

**PROBLEM**  
Aging LAN/WAN across 40+ offices, inconsistent security policy, and limited visibility.

**SOLUTION**  
SD-WAN overlay with NGFW, centralized management, and segmented VLANs.

**RESULT**  
99.9% uptime · 60% faster rollout · unified policy across all sites.

**EDUCATION**

**3x** CAPACITY

**Smart Campus Wi-Fi & Digital Classrooms**

**PROBLEM**  
Intermittent connectivity, unmanaged devices, rising demand for digital learning.

**SOLUTION**  
High-density campus Wi-Fi, NAC, classroom AV, and managed service with SLA.

**RESULT**  
3x capacity · <1% packet loss · full BYOD visibility & control.

**ENTERPRISE**

**40%** LOWER TCO

**Data Center Modernization & DR**

**PROBLEM**  
Legacy servers, no DR, and recurring downtime impacting critical workloads.

**SOLUTION**  
Hyperconverged refresh, secondary DC for DR, backup automation, NGFW refresh.

**RESULT**  
RTO <1 hr · 40% lower TCO · zero unplanned downtime in 12 months.

# Engineering Depth, Certified

OEM-credentialed expertise proven through industry-recognized certifications.

**NSE 7**

**FORTINET**

## Network Security Architect

FortiGate, FortiAnalyzer, FortiManager · advanced network security architecture and threat mitigation.

**CCS**

**CISCO CERTIFIED SPECIALIST**

## Enterprise Advanced Infrastructure Implementation

Advanced routing, switching, VPN, SD-WAN, and enterprise network implementation.

**HPE**

**HPE ARUBA NETWORKING CERTIFIED EXPERT**

## Campus Access Mobility

Enterprise Wi-Fi design, ClearPass policy, and high-density mobility deployments.

**HPE**

**HPE ARUBA NETWORKING CERTIFIED EXPERT**

## Campus Access Switching

CX switching fabric, campus access architecture, and enterprise network operations.

# The SRI INFOIT Advantage

What customers get when they choose us as their System Integrator of record.

## Measurable ROI

**↑ 3x Productivity**

Faster rollouts, lower TCO, and consolidated vendor management.

## Scalable Architecture

**99.9% Uptime**

Designs that scale from pilot to enterprise without re-architecture.

## Uncompromised Security

**Zero Trust Ready**

Security built in from day zero — not bolted on.

● LET'S TALK

# Book a **Free** 30-minute Consultation.

Share your priorities. We'll map them to a concrete engagement plan — architecture, BOM, timeline, and TCO — in one and TCO — in one working session with our solution architects.
